### Understanding the UK Dental System

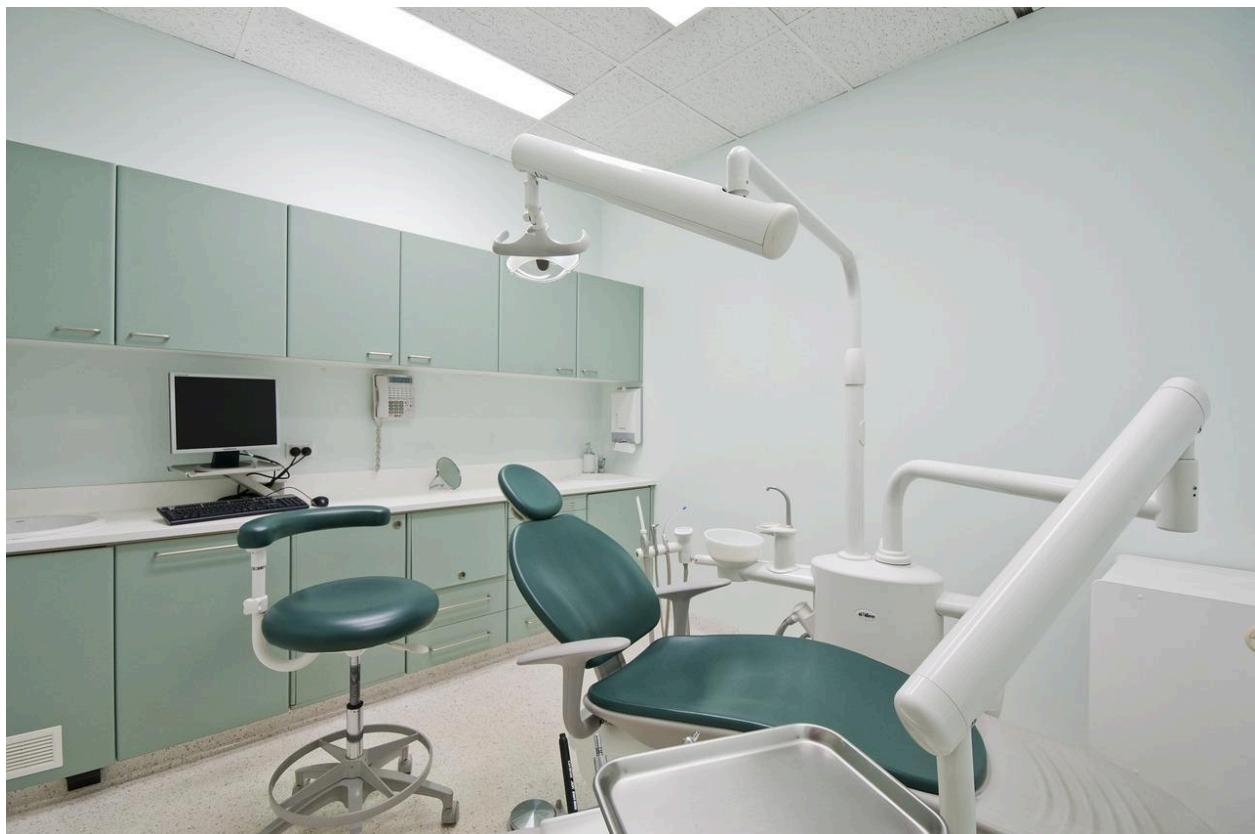

In the UK, dentistry is a regulated profession governed by the General Dental Council (GDC). To work as a dentist, one must be registered with the GDC. For UK citizens, this typically means completing a Bachelor of Dental Surgery (BDS) degree from a GDC-recognised university. However, for overseas dentists, the process involves additional steps.

## Pathways for Overseas Dentists

**Foreign-trained dentists have a few options to gain registration with the GDC:**

**Overseas Registration Exam (ORE):** The ORE is the most common route for non-UK dentists. It is a two-part exam designed to assess clinical skills and knowledge to ensure they meet UK standards.

**Postgraduate Qualifications:** Dentists who pursue a UK-recognised postgraduate degree (such as an MSc in Dentistry) might qualify for registration through certain pathways depending on their qualifications and experience.
